COMPETITIVE PRICING ON VOLUME

ANTIBODY AND ANTIGEN KITS AVAILABLE

Klinik Solutions Australia and MD Solutions have partnered with CTK Biotech USA, the world's industry leader in rapid testing, with over 30 years experience.

The biggest advantage our kit has is, in the latest IFU our Sensitivity is 94.7% for NASAL swabbing, not Nasopharyngeal.

This means that you can test people "every day" without it being seriously uncomfortable and painful. It is very safe and easy with full training and support available.

PRODUCT FEATURES

- Supports patient management decisions by detecting viral components within first seven days of symptom onset
- Sample collection made easier through nasal swab procedure for patient comfort and end-user flexibility
- Pre-filled extraction tubes simplify test procedure
- 94.7% Sensitivity; 100% Specificity
- Fast results in 15-20 minutes
