

Introduction to Facial Ultrasound

About the Workshop

This workshop is for cosmetic injectors who are interested to learn more about using ultrasound in their aesthetic practice. The workshop has been designed with a very practical focus and you will be learning how to use ultrasound on the day. Numbers are strictly limited due to the practical nature of the course.

The course will cover:

- Latest ultrasound technology
- Appearance of soft tissue, fillers and foreign bodies on ultrasound
- Sonoanatomy of the facial arteries
- Sonoanatomy of the facial muscles and fascia
- Needle guidance techniques
